CAUSE OF DEADLOCK HIDDEN.

Woodsmen Arrive in Large Numbers at Sault Ste. Marie, Angry at the Treatment They Have Received.

Detroit, Sept. 26 .- A dispatch to the Evening News from Sault Ste. Marie says: A deadlock between the officials of the Consolidated Lake Superior Company and the representative of the Speyer syndicate, has developed, but for what reason cannot be learned here at this

Mr. Bicknell, a Toronto attorney, arrived yesterday, under orders from Speyer & Co., to take possession of the plants. He urged the men to be calm and face the situation in the best manner possible, since it was unavoidable. He urged the men to take the employment offered them in other camps, leaving their time checks with responsible parties to collect the money when payment was made and forward it to those to whom it was due.

He told the men the company would provide food and shelter for those who needed it, and, as a result, a large number of them slept in the car barns last night. They were fed at the various restaurants, and although feeling angry over the entire transaction seemed inclined to be peaceable.

If the miners and other woodsmen who come in later are as peaceable as these are at the present time, trouble of a serious nature may be avoided.

Policeman Beaten by Negroes. Chicago, Sept. 26.—Patrolman Dennis Fitzgerald was knocked down and bent-en with his own club and then shot twice with his own revolver early to-day by two negroes, whom he had stopped. Later, John Johnson and Louis Plisen were arrested as the assailants. Pilsen, it is said, has confessed and implicated John-

REPUBLIC SPECIAL New York, Sept. 28 .- The opening tradshowed a slightly improved tone from neavy liquidation practically at an end, but the early gains were lost toward the end of the last hour, and the appearance of the bank statement, showing a decrease of \$8,137,000 in deposits, was the signal for a general decline, in which

Metropolitan lost 3% points and Manhattan 2, while the largest decline in the active railroad list was of 2% points in Baltimore and Ohio. That stock sold under 74. There were declines of from 3 to 5 points in inactive issues, which represented forced liquidation.

The United States Steel shares were relatively under less pressure than of late. though the common touched 16, the bottom figure for it, and the preferred sold at 60%. There was a further slump in Steel bonds to 70%, a loss of a point for the day. Just before the closing, the market rallied slightly.

The selling of the last half hour was so violent that all of the rumors of the past lew days were put in circulation again. The weaknes of Brooklyn Rapid Transit especially attracted attention. The general belief was that the heaviness of the market was largely due to forced selling, resulting from the calling of loans on individual accounts. Commission-houses did not figure as sellers to any extent. Leading houses again said to-day that

the situation was perfectly sound, and that, so far as they knew, no houses were in any way embarrassed. One of the bestknown bank presidents, in the clearingouse, declared that the loans held by the banks were safe and exceedingly well margined. He said that the banks were doing a

conservative business, and, while the decline in prices seemed to lead to many apprehensions, there was no indication of any trouble. Within the last few days the banks, he

said, had considered the situation from all points of view, and representatives of many of the leading banks had been in communication to-day. The consensus of opinion favored the continuance of the liquidation in the stock market to a moderate extent.

TREVES SUMMONED BY KING.

Reports Spread Throughout London as Result.

SPECIAL BY CABLE. London, Sept. 26.-Some alarm was caused to-day when it became known that Doctor Frederick Treves, the famous expert in diseases of the appendix, has been called to Balmoral Castle and was attending the King.

One report had it that the King was not ill, but slight disquieting symptoms and become manifest as a result of the fatigue from his trip to Scotland, and that he wished to consult Doctor Treves.

This report was later confirmed by careful inquiries in best informed circles in London. It was said that there was no reason for alarm.

Doctor Treves had informed his friends that he was going to Ealmoral thirty-six hours before he lett. He said his visit would be merely a formal one. He believed, however that the King wished to have a medical consultation with him.

The abandoned mine on the Patterson farm, near the scene of the crime, which was supposed to have been used as a refuge by the criminals. was closely guarded last night, and this morning was thoroughly explored without any evidence being discovered that the men had been hiding there, and the searchers left satisfied that the mine was empty.

Early to-day, John Welsh, a resident of West Middletown, found the satchel in which Contractor Ferguson had carried the money. It was rifled of the roll of bills, amounting to about \$5,500. Some \$20 in silver were left in it; also some valu-

General Manager Norton, of the Ferguson Company does not think that the suspects under arrest committed the deed but believes they know something about it. He is of the impression that it was committed by some one employed in the camp and they are remaining in the camp in order not to excite suspicion.

The dead man was one of the best-known railroad contractors in the country. He was associated with his brother. F. M. Ferguson, in the contracting concern, the latter brother being president of the company. The Ferguson family came originally from Kansas, and a great deal of railway work has been done in the West by the Ferguson Company.

NEW YORK STONECUTTERS MAY FORCE A LOCKOUT.

Refuse to Sign Arbitration Plan or Work With Members of the Newly Formed Unions.

New York, Sept. 26 -Another general shutdown of all building operations in this city, directly involving more than a hundred thousand employes, is believed to be a possibili y, owing to the refusal of the journeymen stonecutters to either sign the arbitration plan of the Building Trades Employers' Association or to work with members of new unions formed under the auspices of that association. As a consequence of this action, the con-

tractors are unable to finish buildings now under construction, and after a long discussion have referred the entire matter to the Mason Builders' Board of Governors. Should a lockout be determined upon more than one hund ed thousand men in all branches would be thrown out of work. However, such drastic action is scarcely probable.

Satiors are being employed on several big buildings to take the places of striking structural iron workers. The employers assert that the experiment has proved a great success, because the men of the sea are accustomed to climbing about high in the air. The difficulty lies in the scarcity of men caring to desert their life at sea. tractors are unable to finish buildings now

earry the oldest girl away. The other children clung to his clothes and screamed. The man was so badly frightened when he saw neighbors coming that he dropped the child and ran. Governor Mickey says that the Warder of the Penitentiary, Mr. Beemer, reported to him twice that a kidnaping attempt had been prophesied by convicts.

One convict said some time ago that such a plan had been formed as a way of setting revenge upon the Governor for his refusal to interfere when William Rhea was hanged last summer for murder. A convict who had been in the plot says a convict soon to be released had been as-

signed to kidnap one of the children to "teach the Governor a lesson." **EMPEROR MAY NOT ATTEND** WAGNER CELEBRATION.

Captain Wales, the Australian Yachtsman and Inventor of Twin Circular Keels, May Construct a Challenger.

SPECIAL BY CARLE TO THE NEW YORK HERALD AND THE ST LOUIS REPUBLIC. London, Sept. 26.-(Copyright, 1903.)-Captain Wales of Sydney is in England with a view to arranging for a yacht to be built for the purpose of contesting for the America's Cup next year.

Captain Wales is well known in Australia as a yachtsman of great experience and also as the inventor of twin circular keels. He claims that, if the Shamrock III had been built according to his invention, she would have beaten the Reliance so much in windward work that the Rellance never would have overhauled her at a run or reach.

Captain Wales intends to demonstrate his invention for the first time in England at an international exhibition of inventions which is to be held at Brighton in November.
